CALLING ALL TEACHERS & STUDENTS

Get ready to ignite your creativity and robot the stage like never before!

WHAT IS NATIONAL NUMERACY DAY?

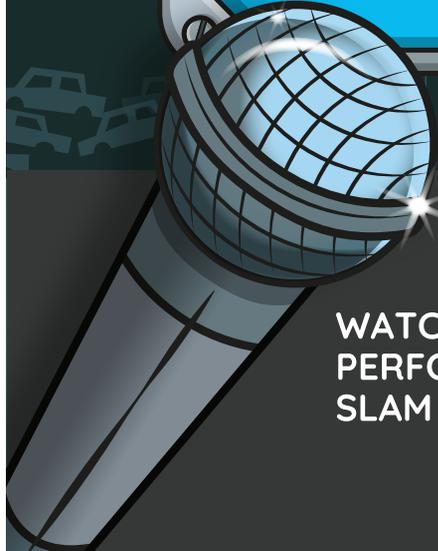

It's a campaign from the charity National Numeracy and is the UK's only day dedicated to everyday maths. This year, we have teamed up with the mighty NumBots for this fun activity!

WHAT IS A RAP SLAM?

It's a way for poets to perform their poems before an audience. You can perform as an individual poet or a group.

WHAT IS PERFORMANCE POETRY?

Performance poetry is about having fun with words and telling a story. It's about listening to others too. Performance poetry can be exciting, funny, sad, fast or furious.

SLAM HERE!

HARRY BAKER

Harry is a British spoken word artist, author and poet. He is a proud Ambassador for the charity National Numeracy. He has won the London and UK Slam Poetry Championships. In 2012, he won the World Slam Poetry Competition, becoming the youngest ever winner.

WHAT A LEGEND!

HARRY'S 'A LOVE POEM FOR LONELY PRIME NUMBERS' HAS OVER TWO MILLION VIEWS. [CHECK IT OUT HERE!](#)

TEACHER GUIDANCE

- Use our writing checklist and templates to help your students write their numbers-themed poems and raps!
- Use our resource bank for top tips and inspiration for your own rap and poetry slam.
- Invite your students to take to the stage to perform their number positive poems and raps as individual performers, small groups or as a whole class.
- Encourage students to dress up as robots to add a vibrant and thematic element to their performances.
- Use the feedback sheet provided to give positive feedback to each performer or group.
- Use this activity to promote and celebrate number confidence.
- Share your students' numbers-themed poems and raps using the hashtag #NationalNumeracyDay.

RAP LIKE A ROBOT

National Numeracy, together with NumBots, invite you to take part in a Rap Slam to celebrate National Numeracy Day 2024!

Task: To celebrate National Numeracy Day 2024, we would like you to write and perform a poem all about you being a super shining diamond at maths! You can do it as a class, in groups or on your own!

It can be funny or serious; quiet or loud whatever you like. Think about how you feel about numbers and maths and how you use them at school, at home and when doing things that you enjoy like your hobbies and share your thoughts through your poem or rap.

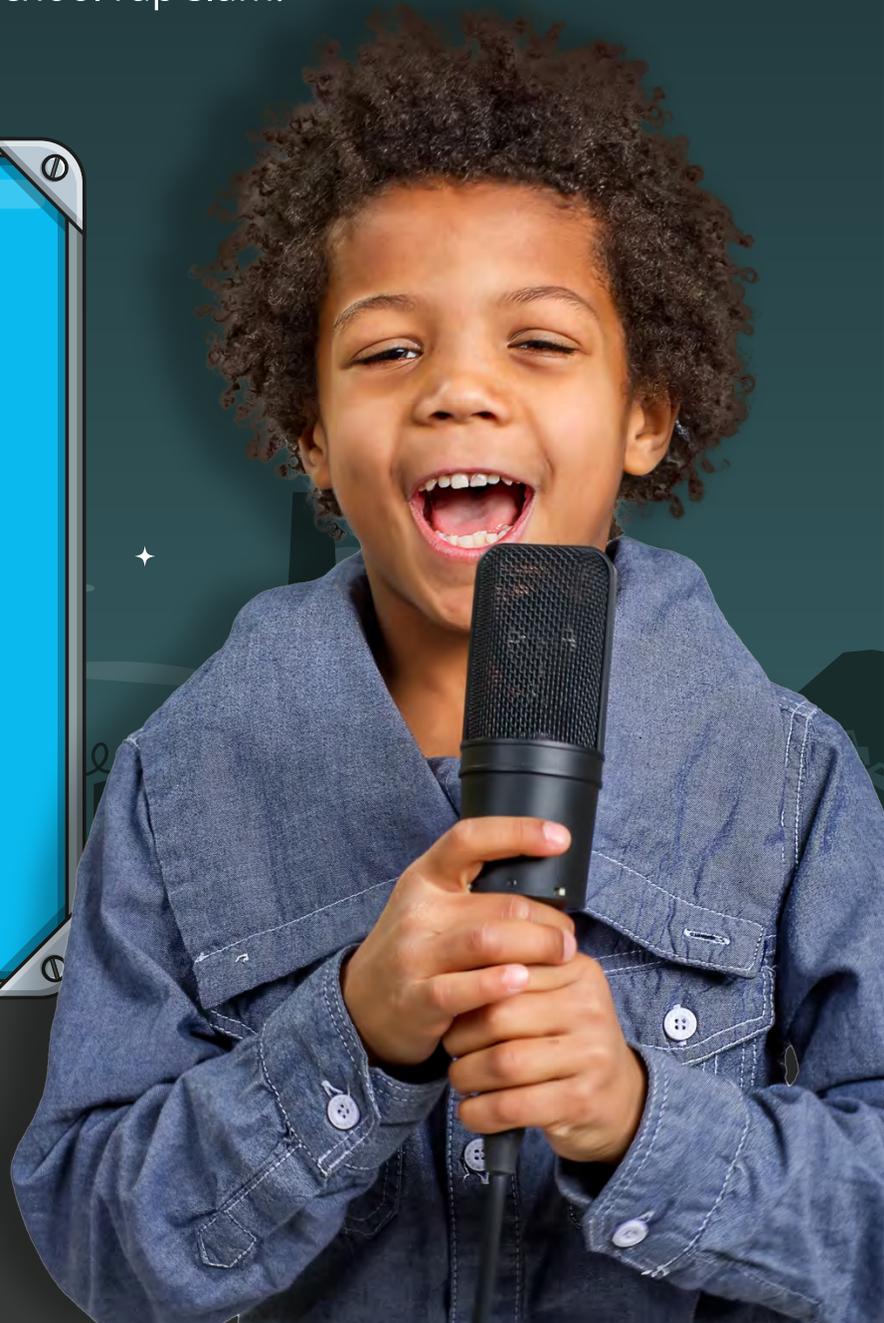

Get ready to perform - you will then perform the poem in a school rap slam!

POEM EXAMPLE:

I SHINE AT MATHS!

From rusty gears
to shiny bright,
In a maths world,
I gleam in delight.
With robot friends,
we learn and play,
Becoming diamonds,
bright as day!

RAP LIKE A ROBOT

HARRY'S TOP TIPS TO SHINE IN YOUR PERFORMANCE

- Practise reading the poem to an adult. Just like maths, sharing your problem with someone else can help you think it through.
- Engage with the audience and make sure you are looking at them and not the floor. It's important to feel confident about the things we're doing, whether it's feeling like we can tackle a maths question or performing a rap!
- Take a deep breath before you start and don't worry about being nervous, it shows you care. It's okay to feel nervous, anxious or worried. These are normal feelings and we can experience them when it comes to maths too.
- Take your time and speak clearly to give people the best possible chance to hear your wonderful words. Whether you're writing a poem or working with numbers, remember to take your time - you don't need to rush.
- Remember that everyone wants you to do well. If you need encouragement you can focus on a friendly face to cheer you on. Writing and performing poetry, just like maths, is a skill we can develop over time. Ability isn't fixed, it's all about feeling confident and believing in yourself.
- Experiment with voice and sound to reflect the ideas in the poem. Think about it like you would a maths problem - it's okay to try again, make mistakes and have another go if you need to.
- Think about what actions you need to put into the performance of the poem or rap. It might help to think about adding actions after you've written the words. Break it down into small, bite sized chunks - it works with maths and it'll work here too!
- Share how you feel about numbers and maths. Talking about how you feel about maths with other people is important as it helps us all feel better about numbers and more confident about using them in everyday life.
- Most importantly...HAVE FUN! Whether it's writing a poem, performing a rap or doing maths, remember that even if it feels scary at first, you can do it!

RAP LIKE A ROBOT

POETRY WRITING CHECKLIST

CAN YOU INCLUDE?

- Rhyming words like 'shine and nine'
- Adjectives like 'sparkling diamond'
- Feelings like 'excited'

So grab your pencils, unleash your imagination, and get ready to rap like the maths diamond you were born to be! Let's robot this Rap Slam and celebrate National Numeracy Day in style!
