TRY THE NATIONAL NUMERACY CHALLENGE

National Numeracy
Getting on with numbers

The National Numeracy Challenge is free for any adult or young person to check your numeracy level, get started with feeling better about maths, and boosting your skills.

All you need is 10 minutes, an email address, and a smart phone, laptop or PC.

Talk with your family

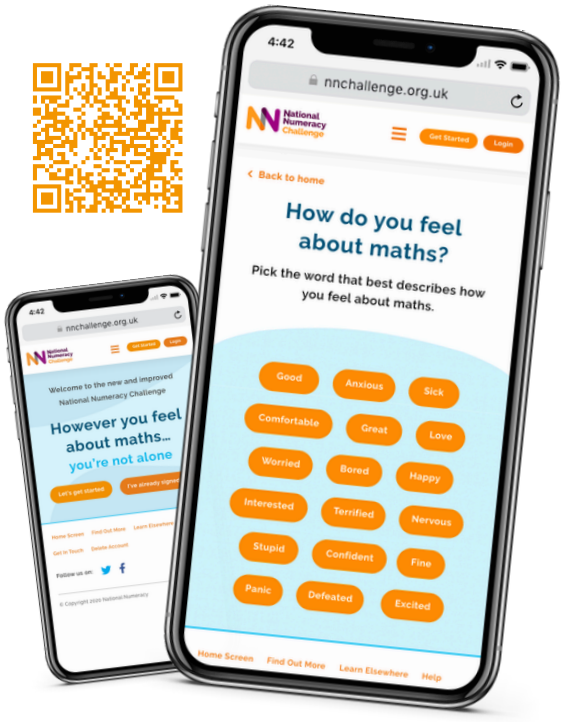

Go to the National Numeracy Challenge by clicking here or scanning the QR code here.

Register using one of your email addresses, then take a quick check together with your family.

Have a look at your score and any questions you got wrong on your home screen. You can find out how to answer each question too.

After this, you can each register with a different email address and have a go. Talk with your family about what you liked or found more tricky.

You can then have another go on a different day and see if your skills and confidence have improved!

What did you learn?

What did you like about the Challenge? Which type of questions do you need to get more confident with?
