

# Using money challenge

Family Maths  
Toolkit

**Gather some items to sell. You could make a toy shop, a supermarket or even a shoe shop. Then you need to make some price tickets.**

Make labels of up to 20p. Now you need some money to buy the items. Use 1p, 2p, 5p, 10p and 20p only.

Decide who will be the shopkeeper and who will be the shopper (you can swap round).

Have fun shopping and then make an advert for your shop to show what you have for sale and the prices.

Which is the most expensive thing for sale?

Do you have any special offers?
