

Special offer

Family Maths
Toolkit

When you go to the shops do you ever look for special offers like two for the price of one? Or buy one, get the second half price?

See how many special offers you can find by looking in a shop or online - are they all good bargains? Sometimes offers are not as good as they seem. For example, two 1 litre bottles of fruit juice for £5.00 when a 2 litre bottle costs £4.99!

Can you find any interesting offers?

Can you choose something you like to eat or drink and make up a good special offer for it?
