

Plan your Number Confidence Week!

Early Years & Primary

We want to make Number Confidence Week as easy as possible for busy teachers. Whether you're planning one session, a full day, or want to do something every day of the week, these ideas should come in handy.

You can find materials to support these sessions in your online toolkit.

If you have...

ONE LESSON

- Get the energy flowing by **dancing with Katya Jones**.
- Try out some of our **Family Maths Toolkit activities** to get kids thinking about maths in communities.

ONE DAY

- Get everyone up and moving by starting the day with **Katya Jones's dance activity**: everyone can follow along with the video, and pupils aged 7+ can try the activity sheet.
- Try out some of our **Family Maths Toolkit activities** in class.
- Round off the day with a **Big Number Natter**. You could also send pupils home with our talking points, to spark conversations with parents, guardians, and other family members.

ONE WEEK

- Put up some of our **bunting and posters** to get everyone in the Number Confidence Week spirit!
- You could set our **Family Maths Toolkit activities** as homework, and then discuss how everyone found them in class.
- You could also send pupils home with our **Big Number Natter talking points** to start conversations with parents and guardians.
- Watch some of our **videos** and discuss them in class.
- Why not discuss number confidence every day, and see how feelings change? Or have a **Number Natter** at start and end of the week, reflecting on some of the key themes you've discussed.
