### **Lights, camera...numeracy! Introducing Star Dash Studios**

Help the young people you work with to take the first step to improving their numeracy. Brought to you by [National Numeracy](#), the same people who brought you the [National Numeracy Challenge](#), Star Dash Studios is a free game which encourages 16-25 year-olds to practise their number skills and appreciate the value of everyday maths in the workplace - and sign-posts them to ways to learn.

The action takes place on a movie set. You are a runner and it's your first job in the film business. You must complete a series of challenges as you encounter members of the film crew - these missions involve everyday maths.

Whilst the game is available for free to anyone, it is primarily designed for 16-25 year olds. Especially those who didn't get on with school maths, feel anxious about it, or don't see the point of it. And if you like runner games and are interested in films, you'll love it too.
